Dividend proposal to the Annual General Meeting:

On 31 December 2015, the Group's parent company had distributable funds totalling EUR 120,642,934 (179,932,379). Alma Media's Board of Directors proposes to the Annual General Meeting that a capital repayment of EUR 0.12 (2014: EUR 0.12) per share be paid from the reserve for invested non-restricted equity for the financial year 2015. Based on the number of shares on the closing date 31 December 2015, the capital repayment totals EUR 9,885,982 (2014: EUR 9,058,422).

No essential changes have taken place after the end of the financial year with respect to the company's financial standing. The proposed distribution of profit does not, in the view of the Board of Directors, compromise the company's liquidity.

Outlook for 2016:

The Finnish economy is expected to show zero growth or only slight growth in 2016. Alma Media's significant operating countries in Eastern Central Europe, such as the Czech Republic and Slovakia, are expected to see continued economic growth, but at a lower rate than in 2015.

Macroeconomic development affects both consumer demand and advertising volume. The structural transformation of advertising will continue in 2016; online advertising will grow, while print media advertising will decline. Total advertising volume is not expected to increase in Finland in 2016.

The Talentum acquisition completed in late 2015 will increase Alma Media's revenue and operating profit in 2016. In 2016, Alma Media expects its full-year revenue and operating profit excluding non-recurring items to increase from the 2015 level. The full-year revenue for 2015 was MEUR 291.5, and operating profit excluding non-recurring items was MEUR 23.4.

Kai Telanne, President and CEO:

For Alma Media, 2015 was a good year, taking the operating environment into consideration. The development of foreign operations was excellent due to strong economic growth in Eastern Central Europe, but the Finnish market did not see the hoped-for recovery that would have supported a significant improvement in Alma Media's result. In 2015, macroeconomic development in Finland was among the weakest in the EU, and consumer purchasing power declined. The weak economic climate in Finland had a negative impact on expectations among consumers and the business sector, as well as advertising investment.

Nevertheless, Alma Media's operating profit excluding non-recurring items improved in 2015 in spite of the difficult economic climate. Revenue for the full year declined to MEUR 291.5 due to divestments. Operating profit excluding non-recurring items increased by 9.3 per cent to MEUR 23.4. Alma Media's business in its primary international markets in Eastern Europe, in particular, showed continued positive profit performance. In the final quarter of 2015, the recruitment business outside Finland grew by nearly 21 per cent.

The focus of media consumption is shifting rapidly to digital channels, mobile in particular. In response to the changes in media consumption, advertising investments in print media are declining and the shift to digital channels is continuing. Alma Media has made a concerted effort to move its business operations and employees from the world of print media towards digital multimedia services. The Group's revenue from digital products and services exceeded the MEUR 100 milestone with year-on-year growth of 8.7 per cent.

In the Digital Consumer Services segment, revenue growth was highly profitable as operating profit excluding non-recurring items grew by 47 per cent from the previous year. The most significant factor in the improved result was the strong development of the recruitment business outside of Finland. In Finland, Alma Media's digital services maintained their profit level.

The improved profitability of the Financial Media and Business Services segment was supported by good advertising sales and the increase in revenue attributable to JM Tieto. Kauppalehti's content sales managed to compensate for the decline in print media by achieving growth in digital content revenue.

For IL-Media, 2015 was a difficult year. Print media content revenue and advertising sales showed a significant decline. Nevertheless, there was a positive turn in digital advertising towards the end of the year. The increase in online advertising sales in the latter part of the year was particularly supported by mobile sales as well as new programmatic buying and targeted advertising solutions.

The Regional Media segment made several divestments and implemented operational restructuring and efficiency improvement measures to secure the profitability of the publishing business. The segment also began a gradual shift towards paid digital content.

One of the biggest news in the Finnish media sector in 2015 was Alma Media's acquisition of Talentum. With the two companies' business operations complementing each other very well, the combination creates a significant player in professional media and business services.

The Talentum acquisition was funded by both equity financing and debt. In spite of this significant investment, Alma Media's financial position remained strong in 2015, with our equity ratio remaining at 42.5%. Our strong balance sheet enables us to continue investing in growth and internationalisation whenever opportunities that are in line with our strategy arise.

We carried out organisational restructuring in our national media sales in 2015. We strengthened our competitiveness and increased our market share in advertising by focusing on areas such as the development of effective digital multimedia solutions and the versatile utilisation of data.

According to TNS Media Intelligence, the media advertising volume in Finland decreased by approximately two per cent in 2015 compared to the previous year, totalling EUR 1.2 billion. It is estimated that media advertising's share of GDP was at a historical low in 2015, at a level that is similar to many developing markets. Well-executed marketing communications play an important role in maintaining economic activity in Finland. Instead of streamlining and cost restructuring, Finland needs an atmosphere that encourages investment, hard work and entrepreneurship in order to increase confidence in the future. If you want to sell and be successful, you must also create consumer demand and be active in marketing.

Strategy and related activities during the review period

The cornerstones of strategic development are multi-channel content, marketing and advertising solutions, digital services and improving resources and competencies.

The review period saw the approval of the combination of Alma Media and Talentum, two major Finnish media companies, which was initially announced in September 2015. The combination supports the continued implementation of Alma Media's strategy in the coming years and creates significant value for the shareholders of both Alma Media and Talentum based on, inter alia, the advantages of having a larger business entity on the digitising media market, on the concrete cost synergies, and on utilising the subscriber potential of the combined company. Alma Media published the final result of the Talentum exchange offer in November 2015. The exchange offer was approved by shareholders representing approximately 95 per cent of Talentum's shares. The combination also received the approval of the Finnish Competition and Consumer Authority. With the other conditions for the exchange offer also fulfilled, Alma Media decided to proceed with the exchange offer to Talentum's shareholders and option rights holders. Trading in the new shares in Alma Media offered in the exchange offer commenced on 20 November 2015. Alma Media initiated arbitral proceedings pursuant to the Finnish Limited Liability Companies Act in November to complete the compulsory redemption of the Talentum shares held by minority shareholders.

The companies initiated integration planning during the review period. In accordance with the combination plan, Talentum's business operations will be combined with Alma Media's Financial Media and Business Services unit. Talentum's management will be combined with Alma Media's Group management. Alma Media estimates that the annual cost synergies expected from the combination may amount to EUR 4–5 million, and the integration costs resulting from the combination will be approximately EUR 1–2 million in the first year of operation following the combination. The integration will proceed to the implementation phase in the first half of 2016.

Alma Media decided to refocus the operations of the Financial Media and Business Services unit and sold the customer media and content marketing service provider Alma 360 to Otavamedia in October 2015.

In accordance with its strategy, Alma Media builds sustainable growth in its business operations by making use of digitisation opportunities. Alma Media focuses on the development and sales of digital content, as well as business growth in services and agile marketing solutions. In its operations, Alma Media has created sustainable growth in digital services while also ensuring the vitality of its traditional, print-based business operations through efficiency measures.

To develop the service business, the Digital Consumer Services segment, for example, provides clients with system and expert services to support their business management while also offering media advertising opportunities. A brokering system and information services have been developed and offered to real estate agents, while recruitment business operations have invested in HR consulting and recruitment systems, for example. Through acquisitions, the service offering has also been expanded to cover ERP systems for the automotive trade. During the review period, Alma Media's subsidiary Alma Mediapartners Oy acquired the software company Autosofta to complement its digital business in the automotive retail industry.

Alma Media continued to implement structural reforms in the fourth quarter in order to improve the profitability of the publishing business. Alma Regional Media, the regional and local newspaper unit of Alma Media, completed statutory personnel negotiations pursuant to the Finnish Act on Co-operation within Undertakings. The negotiations began in September and concerned a total of 500 employees. A total of 19 employees were laid off, while a further reduction of approximately 50 man-years was accomplished through retirement or other arrangements. The negotiations concerned all of the publication employees of Regional Media, with the exception of papers published in Lapland. Alma Manu Oy, the printing and distribution company under Regional Media, was not included in the negotiations.

In December 2015, Alma Media's Board of Directors approved the company's updated strategy for 2016–2018. The update of the strategy did not involve any changes to Alma Media's long-term financial targets. The cornerstones of the strategy are content, multimedia solutions, the service business, as well as resources and ways of working.

Domestic market conditions

According to TNS Media Intelligence, total advertising volume decreased by 1.8% (decreased by 4.9%) in the final quarter of the year. In terms of volume, the total market of afternoon papers declined by 15.3% (declined by 7.1%) in 2015.

Changes in Group structure in 2015

In January 2015, Alma Media acquired the entire share capital of JM Tieto Oy as a business combination achieved in stages. Prior to the acquisition, Alma Media held a 20% stake in the company. JM Tieto Oy specialises in improving the effectiveness of B2B sales, with a focus on marketing information and its utilisation. JM Tieto was reorganised to form part of Kauppalehti Business Information Services' operations.

In March 2015, Alma Media's newspaper business in Kainuu was transferred to a new owner, SLP Kustannus Oy. The divestment saw the regional newspaper Kainuun Sanomat, the town paper Koti-Kajaani and three subscription-based local papers transferred to the subsidiary of Suomalainen Lehtipaino Oy. The transaction does not affect Alma Media's result for 2015.

Alma Media's subsidiary Alma Media Kustannus Oy divested Koti-Lappi, a town paper published in Kemijärvi, in April 2015.

Alma Media's subsidiary Alma Media Kustannus Oy divested Kuriiri, a town paper delivered to all households in Ranua and Posio. Starting from 1 July 2015, the new publisher of the town paper has been Kuriirilainen Oy, a company owned by the paper's current employees.

On 1 October 2015, Alma Media sold Alma 360, the customer media and content marketing service provider, to Otavamedia.

Alma Mediapartners Oy, a subsidiary of Alma Media, acquired the software company Autosofta from its founders in October in order to complement Alma Media's digital business in the automotive retail industry. The annual revenue of Autosofta, which has its head office in Kempele, is approximately EUR 0.5 million.

Alma Media acquired a controlling interest in Talentum Corporation on 17 November 2015. Talentum was previously reported by the Group as an associated company and consolidated using the equity method. The Group's previous holding was 14,236,295 Talentum shares, which corresponded to 32.4 per cent of the outstanding shares. The conditions of the exchange offer were fulfilled on 17 November 2015, from which time Talentum has been part of Alma Media Group and it is consolidated in the consolidated financial statements dated 31 December 2015 as a subsidiary.

More detailed information on acquired subsidiaries is provided in the tables section of the Financial Statement Release, on page 26.

Other decisions by the Annual General Meeting

The AGM authorised the Board of Directors to decide on the repurchase of a maximum of 754,000 shares in one or more lots. The proposed maximum authorised quantity represents approximately one per cent of the company's entire share capital. The shares shall be acquired using the company's non-restricted shareholders' equity through trading in a regulated market arranged by NASDAQ Helsinki Oy and in accordance with its rules and instructions,

which is why the acquisition is directed, that is, the shares are purchased otherwise than in proportion to shareholders' current holdings. The price paid for the shares shall be based on the price of the company share in the regulated market, so that the minimum price of purchased shares is the lowest market price of the share quoted in the regulated market during the term of validity of the authorisation and the maximum price, correspondingly, the highest market price quoted in the regulated market during the term of validity of the authorisation. Shares may be purchased for the purpose of improving the company's capital structure, financing or carrying out corporate acquisitions or other arrangements, implementing incentive schemes for the management or key employees, or to be otherwise transferred or cancelled. The authorisation is valid until the following ordinary AGM, however no longer than until 30 June 2016.

The AGM authorised the Board of Directors to decide on a share issue by transferring shares in possession of the company. A maximum of 754,000 shares may be issued on the basis of this authorisation. The proposed maximum authorised quantity represents approximately one per cent of the company's entire share capital. The authorisation entitles the Board to decide on a directed share issue, which entails deviating from the pre-emption rights of shareholders. The Board can use the authorisation in one or more parts. The Board of Directors may use the authorisation to implement incentive programmes for the management or key employees of the company. The authorisation is valid until the following ordinary AGM, but no longer than until 30 June 2016.

The AGM authorised the Board of Directors to decide on a share issue. A maximum of 15,000,000 shares may be issued on the basis of this authorisation. The proposed maximum authorised amount represents approximately 20% of the company's entire share capital. The share issue may be implemented by issuing new shares or transferring shares now in possession of the company. The authorisation entitles the Board to decide on a directed share issue, which entails deviating from the pre-emption rights of shareholders. The Board can use the authorisation in one or more parts. The Board may use the authorisation for developing the capital structure of the company, widening the ownership base, financing or realising acquisitions or other arrangements, or for other purposes decided on by the Board. The authorisation may not, however, be used to implement incentive programmes for the management or key employees of the company. The authorisation is valid until the following ordinary AGM, but no longer than until 30 June 2016. This authorisation overrides the share issue authorisation granted at the Annual General Meeting of 20 March 2014.

In accordance with the proposal of the Board of Directors, the AGM resolved to establish a Shareholders' Nomination Committee. The Nomination Committee's duties include preparing proposals related to the election and remuneration of the member of the Board of Directors to the Annual General Meeting. In conjunction with this decision, the AGM approved the Charter for the Shareholders' Nomination Committee as proposed by the Board of Directors. The Shareholders' Nomination Committee consists of four members appointed by shareholders, and the members elect a chairman from among their number. In addition, the Chairman of the Board acts as an expert member in the Nomination Committee. In the year preceding the AGM, on the basis of shareholding on 30 September in the preceding calendar year, the Chairman of the Board will request each one of the four largest shareholders to appoint one member to the Shareholders' Nomination Committee. The four shareholders who are registered in the shareholder register maintained by Euroclear Finland Ltd on 30 September in the year preceding the AGM and whose share of the votes produced by all shares in the company is the greatest according to this shareholder register have the right to nominate members to represent shareholders. Should a shareholder choose not to exercise the right to appoint a member, the right is transferred to the next largest shareholder in the shareholder register, who would not otherwise have the right to appoint a member. The Nomination Committee Charter is available on the Alma Media Corporation website at <http://www.almamedia.fi/en/investors/governance/nomination-committee>.

Further details about the programme are given in the notes to this Interim Report.

The Board of Directors of Alma Media Corporation has approved the establishment of a new long-term share-based incentive programme for the key management of Alma Media. The LTI 2015 arrangement consists of annually commencing individual plans, each subject to separate Board approval. Each of the individual plans consists of three main elements: an investment in Alma Media shares as a precondition for the key management member's participation in LTI 2015, matching shares based on the above share investment and the possibility of earning performance-based matching shares. At most 35 people are eligible to participate in the first plan under the LTI 2015 arrangement, commencing in 2015.

Flagging notices

In 2015, Alma Media received notices of changes in shareholdings pursuant to Chapter 9, Section 5 of the Finnish Securities Markets Act as follows:

On 20 November 2015, Mariatorp Oy announced that the agreement for which it issued a flagging notice on 12 November was carried through, and that due to the increase in Alma Media's number of shares as a result of the completion of the Talentum exchange offer, Mariatorp's holding of the shares and votes in Alma Media has fallen below the threshold of 20 per cent. Following this event, Mariatorp Oy held approximately 18.8% of Alma Media's share capital and votes.

On 12 November 2015, Mariatorp Oy announced that it has signed an agreement that, if realised, would result in the acquisition of shares and voting rights and Mariatorp's holding of the shares and votes in Alma Media would exceed the threshold of 20%.

On 30 April 2015, Mariatorp Oy (Business ID 1948056-9, also referred to below as the Demerging Company) issued a flagging notice according to which had Mariatorp Oy signed a demerger plan on 30 April 2015 regarding a total demerger pursuant to Chapter 17, Section 2, Subsection 1 of the Finnish Securities Markets Act (624/2006). In connection with the registration of the execution of the demerger, the assets, liabilities and rights of the Demerging Company would be transferred without liquidation proceedings to the two new limited companies to be founded as stated in the demerger plan. As the demerger was executed, the shares of Alma Media Corporation owned by the Demerging Company in which Niklas Herlin exercises controlling power would be transferred in connection with the registration of the execution of the demerger to Mariatorp Oy that was to be founded. No shares of Alma Media Corporation would be transferred to the other company.

The registration of the execution of the demerger was completed on 31 August 2015 according to the notification received by Alma Media. After the execution of the demerger, the new Mariatorp Oy held 16.03% of Alma Media Corporation's shares and votes carried by the shares (12,100,000 shares).

Risks and risk management

The purpose of Alma Media Group's risk management activities is to continuously evaluate and manage all opportunities, threats and risks in conjunction with the company's operations to enable the company to reach its set objectives and to secure business continuity.

The risk management process identifies and controls the risks, develops appropriate risk management methods and regularly reports on risk issues to the risk management organisation and the Board of Directors. Risk management

is part of Alma Media's internal control function and thereby part of good corporate governance. Alma Media specifies limits to and procedures for quantitative and qualitative risks in writing in its risk management system.

The most critical strategic risks for Alma Media are a significant drop in its print newspaper readership, a permanent decline in advertising sales and a significant increase in distribution and delivery costs. The media industry is undergoing changes following the transformation in media consumption and technological development. Alma Media's strategic objective is to meet this challenge through renewal and the development of new business in digital consumer and business services.

Fluctuating economic cycles are reflected in the development of advertising sales. Advertising sales account for approximately half of the Group's revenue. Business operations outside Finland, such as in Eastern and Central European countries, include country-specific risks relating to market development and economic growth. The expansion of business outside Finland has reduced the risks inherent in operating in one market area.

Disturbances of information technology and communications as well as disruption of printing are the most important operational risks.

Events after the review period

In January 2016, LMC s.r.o, part of Alma Career Oy and the leading provider of digital recruitment services in the Czech Republic, acquired Jobote s.r.o, a Czech start-up developing and providing new technology in recruitment. Its online service jobote.com is targeted at reaching the most skilled and hard-to-find candidates.

In January 2016, Alma Media's subsidiary Alma Mediapartners Oy acquired 51 per cent of the share capital of Raksa ja KotiKauppa Oy from the company's founders. The company provides ERP systems for construction and renovation. The revenue of Raksa ja KotiKauppa Oy for 2015 is expected to amount to approximately EUR 0.5 million.

In February 2016, Alma Regional Media announced plans to reorganise its customer service operations. The goal is to create a model that would better support digitised media consumption and customer service. At this juncture, possibilities will be explored to achieve closer cooperation between customer services and the circulation service. Alma Regional Media will commence statutory personnel negotiations to prepare for potential impact on employees. According to the provisional plan of the employer, the required reduction in workforce is 34 person-years at most.

Option programme

Alma Media has the option programme 2009 in effect. The programme is an incentive and commitment system for Group management.

Under the option programme 2009, a maximum total of 2,130,000 stock options could be granted during 2009–2011, and these could be exercised to subscribe to a maximum of 2,130,000 Alma Media shares, either new or in possession of the company. Of the total number of options, 710,000 were marked 2009A, 710,000 were marked 2009B and 710,000 were marked 2009C.

The option programmes 2009A and 2009B have ended.

A total of 640,000 options were issued under the 2009C programme. The share subscription period for 2009C is 1 April 2014–31 March 2016. The management has 535,000 options 2009C in its possession. The share subscription price was EUR 7.23 in December 2015.

If all the subscription rights are exercised, the option programme 2009 will dilute the holdings of the earlier shareholders by a maximum of 1.0%.

Share-based incentive programme 2015

In February 2015, the Board of Directors of Alma Media Corporation approved a new share-based incentive programme for the key management of Alma Media (LTI 2015).

Three plans were started in spring 2015 under the programme: a fixed matching share plan and two performance matching plans. Investment in Alma Media shares is a precondition for participation. A total of 33 people are participating in the plans with 76,550 shares. In each plan, the participant can earn a maximum of two matching shares for each invested share, which means that the maximum number of Alma Media shares that can be earned under the plans is 459,300 shares (gross amount from which taxes are withheld).

In the fixed matching share plan, the participant receives two matching shares for each invested share free of charge after a two-year vesting period, provided that the participant holds on to the shares invested in the plan and remains employed by Alma Media Group for the duration of the vesting period, or until spring 2017. The maximum number of matching shares that can be earned is currently 153,100 shares (gross amount from which taxes are withheld).

In the performance matching plans, the participant may earn at most two matching shares based on the profitable growth of the digital business and at most two matching shares based on the total shareholder return of the Alma Media share. Any performance matching shares earned will be paid based on digital business growth in spring 2018 and based on the total shareholder return of the company's share in spring 2020. The maximum number of matching shares that can be earned under both of the performance matching plans is currently 153,100 shares (gross amount from which taxes are withheld).

Payment of the incentive is contingent on the participant holding on to the shares invested in the plan and remaining employed by the Group for the duration of the plans, until March 2017, 2018 and 2020. The incentives are paid partly in cash and partly in shares. The cash component is intended to cover taxes incurred by the participant from the incentive.

The fair value of the reward is expensed until the matching shares are paid. The fair value of the share component is determined on the date on which the target group has agreed to the conditions of the plan. The financing cost arising from the obligation to hold shares and dividends expected during the vesting period have been deducted from the value of the share. The fair value of the plan based on the total shareholder return of the share also takes the market-based earning criteria into consideration. The cash component of the incentive is remeasured on each reporting date during the vesting period based on the price of the share on the date in question.

Main accounting principles (IFRS)

This Financial Statement Release has been prepared according to IFRS standards (IAS 34). The financial statement release applies the same accounting principles and calculation methods as the annual accounts dated 31 December 2014. The financial statement release does not, however, contain all the information or notes to the accounts included in the annual financial statements. This financial statement release should, therefore, be read in conjunction with the company's financial statements for 2014. The accounting principles of the financial years 2014 and 2015 are comparable. The company has no discontinued operations to report in the 2014–2015 financial periods.

The key indicators are calculated using the same formulae as applied in the previous annual financial statements. The quarterly percentages of Return on Investment (ROI) and Return on Equity (ROE) have been annualised using the formula $((1 + \text{quarterly return})^4 - 1)$. The percentage of online business of revenue is calculated as $\text{online business/revenue} * 100$. The figures in this interim report are independently rounded.

No new accounting standards were adopted on 1 January 2015.

The figures in this release are unaudited.

Seasonality

The Group recognises its content revenue from publishing activities as paid. For this reason, content revenues accrue in the income statement fairly evenly during the four quarters of the year. The bulk of newspaper subscription invoicing takes place at the beginning of the year and, therefore, the cash flow from operating activities is the strongest early in the year. This also affects the company's balance sheet position in different quarters.

General statement

This report contains certain statements that are estimates based on the management's best knowledge at the time they were made. For this reason, they contain a certain amount of risk and uncertainty. The estimates may change in the event of significant changes in the general economic conditions.
